

April is STD Awareness Month

- Today -

- * 10,000 Teens will contract an STD
- * 2,400 Teenage Girls will become pregnant
- * 55 Teens will contract HIV

Chlamydia - more common among teens than older adults

Gonorrhea – higher rates in teens than older adults

As many as 15% of sexually active teenage women are infected with **HPV**, many with the type of HPV linked to cervical cancer.

Many STDs cause few or no symptoms and are NOT a part of Standard STD Testing!
